## *Company Overview*

ASB Avionics LLC, CAGE 3PFM7, a veteran-owned small business, located at 1032 Sabovich Street, Mojave, CA, 93501, is a wholly owned US company, registered in the state of California, USA.

Established in 1991, ASB has provided custom avionics installations to Corporate Aviation, Air Transport, and Government airframes. ASB holds FAA Certified Repair Station (CRS) certificate #UMDR221L.

## *Customer Services*

ASB services aircraft and equipment ranging from multi-engine to Air Transport and Government aircraft. ASB is well equipped to provide individual custom service to all our customers. Avionics are unique in that every aircraft has its own individual requirements as far as systems and the configuration of these systems.

ASB provides custom engineering and installation of TCAS-II, Mode-S Transponder, GPS/FMS, Flat Panel Display EFIS, Enhanced GPWS, TAWS, Inertial Reference Systems, Collins Proline-21 Systems, Honeywell Primus-II, Satcom Systems and many more. ASB represents major avionics manufactures such as Goodrich, Honeywell, L-3 Avionics and ACSS, Rockwell Collins, Universal Avionics, and many more.

## *Maintenance Facilities*

ASB Avionics has a built to purpose facility to meet your aircraft needs, located in Mojave CA, USA, at the Mojave Space and Air Port.

Our Mojave facility incorporates sales, engineering, a state of the art fabrication and repair shops, a sheet metal shop, and customer representative office space, to provide a facility with the capability to take any project from initial design to completion.

## *Customer Profile*

ASB Avionics customer base ranges from large aircraft operators to corporate and private owners. We also engage in many projects with modification centers for contracts with various corporate, government, and military groups, in which we provide all avionics functions consisting of certifications, installations, and modifications

## *System Quality*

With our many manufacturer dealerships, engineering, fabrication, installation, and repair capabilities we have the ability to take any avionics project from concept to completion. Our capabilities allows us the ability to customize any project to meet our customers varied requirements while ensuring the best quality on all projects in accordance with FAA regulations.
